Your Heaven® CloseUp® Mic System

Important Note for Windows Users:

Please make sure the CloseUp® Mic System is plugged into the computer with the USB cable *before* starting the CloseUp Mic System program.

Otherwise the CloseUp® System hardware may not be recognized as an audio device during the profiling process and you will have to close the program and start over.

You may see instructions in the program telling you to plug in the USB. You can ignore them if it's already plugged in.

Thanks,
The Your Heaven® Team
