

YOUR HEAVEN® AUDIO

NATURAL ACOUSTIC SOUND

PREMIER ACOUSTIC MIC SYSTEMS. AMPLIFY AND RECORD IN ANY ENVIRONMENT WITH SUPERIOR ISOLATION AND STUDIO MIC SOUND QUALITY.

MUSICIANS FACE CHALLENGES... WE'VE BEEN LISTENING

"I WANT A CLEAR SOUND WHEN PERFORMING LIVE WITHOUT THE DISTORTION OF A PIEZO PICKUP"

Pickups are convenient, but you pay a price in sound quality. With patented breakthroughs in sound engineering, the CloseUp® System provides an authentic, clear broadcast without the processed sound imparted by a traditional pickup.

"I WANT PROFESSIONAL LEVEL RECORDING AT HOME AND WHEN PERFORMING LIVE"

The CloseUp® System records instruments with high-quality audio while isolating from background noises, even in noisy rooms or outside. Our patented system captures rich, accurate sound in any environment.

KEY FEATURES

- HIGH-END STUDIO MIC SOUND QUALITY, LIVE IN ANY ENVIRONMENT
- SUPERIOR ISOLATION
- QUICK, SAFE INSTALLATION WITH NO INSTRUMENT MODIFICATION REQUIRED
- LIGHTWEIGHT, EASY TO USE

APPLICATIONS

- PERFORMING AND RECORDING LIVE IN INDOOR/OUTDOOR VENUES
- MID-SIZED TO MAJOR VENUES WITH LARGE SOUND SYSTEMS
- SMALL, INTIMATE SETTINGS SUCH AS COFFEE SHOPS AND HOUSE CONCERTS
- OUTDOOR VENUES FROM BUSKING TO WEDDINGS

TECHNICAL SPECS

- Balanced Analog Line Level Output (switchable to Unbalanced Stereo for universal compatibility)
- Easy, one-time customization process creates a unique profile for your instrument
- Onboard memory stores up to four instrument profiles
- Headphone out option for monitoring or overdubbing
- Built-in USB Audio Interface with Zero-Latency Monitoring for direct digital recording
- Mute footswitch for tuning or switching instruments
- Three power options: (9V DC, USB, 9V Battery)

The acoustic guitar track had NO LEAKAGE (vocal or drums) and sounded great. We used the basic acoustic track in the final mix. No piezo anywhere in sight!!!

This is a first in my 40 years of recording.

Steve Addabbo

AUDIO FIDELITY

Your sound, just louder. The Your Heaven[®] CloseUp[®] System offers superior clarity and signal fidelity with its patented hardware and software.

Only 0.63dB of mean spectral deviation was recorded in our benchmarks, outperforming hypercardioid mics and built-in pickups.

Mean Spectral Deviation from Omnidirectional reference mic

SOUND ISOLATION

CloseUp[®] technology achieves superior sound isolation, while rich, natural sound is captured, rejecting ambient noise and feedback.

PERCEIVED DISTANCE OF UNWANTED NOISE SOURCE LOCATED 5 FT AWAY FROM INSTRUMENT (FARTHER IS BETTER)

The CloseUp[®] System outperforms five industry-leading mics in our benchmark recordings, making an unwanted noise source located 5ft from the instrument sound like it is 247ft away.
